NEW SUPERFAST CMMS

JOBO - 36CSS

53,000 CAPS/HR

Under the premise of Machine Stability, we've improved the cooling system and developed a new oil allocation system, which are the keys to improve the machine speed.

SPECIFICATION

JOBO-36CSS

SPECIFICATION	JOBO-36CSS
MODEL	JOBO-36CSS
CAPACITY	35000-53000 CAPS/HR
CAP DIAMETER	18-60 MM
CAP HEIGHT	12-50 MM
TOTAL INSTALLATION POWER	105 KW
ACTUAL PRODUCTION POWER	80 KW
COMPRESSED AIR REQUIREMENT	1 M ³ /MIN
OPERATING VOLTAGE	380V, 50HZ (Customizable)
MACHINE DIMENSION	L4600*W2200*H2100 MM
MACHINE WEIGHT	10000 KG

FAST SPEED CMM

JOBO - 36CS

42,000 CAPS/HR

The Rotary Cap Compression Molding Machine is used to make various types of Plastic Caps through high-temperature plasticizing. This machine is easy to operate and saves electricity, water, and labor cost. Additionally, there is no wasted material, which significantly reduces the cost of making caps.

CAP FOLDING MACHINE

JOBO-27CS

The Folding Machine is designed to fold the extended part of the anti-theft ring inward, completing the cap's shape with a secure fit. Synchronized with the speed of the Cap Compression Molding (CCM) Machine, it efficiently resolves the issues of anti-theft ring folding.

SPECIFICATION

CAP SLITTING MACHINE

JOBO-28CS

The Slitting Machine, equipped with a pneumatic system and PLC automatic control, is used to neatly slit anti-theft rings on bottle caps. It ensures accurate kerf depth adjustment and consistent ring height, resulting in clean and tidy caps.

CAP COOLER MACHINE

JOBO-32

The machine is a cooling device designed for essential plastic caps. It features an inclined internal rotating net and a blower mounted on one side of the support frame. This setup ensures fast and even cooling, maintaining the quality, strength, and shape of each cap through out the production process.

CAP LINING MACHINE

JOBO-29

The Cap Lining Machine is designed to insert liners into plastic bottle caps, using TPE (Thermoplastic Elastomer) pellets. The machine molds the liners directly into each cap. Controlled by a PLC system, it meets stringent food-grade hygiene standards. The liners provide a secure seal, ensuring excellent leak protection and pressure resistance to keep the product safe inside the bottle.
